

CBRN Protective Gloves

Designed to be worn with many CBRN ensembles, CQC's Breathable Gloves offer the perfect solution to the important integration between suit cuff and hand protection, no-matter what CBRN garment system is being used.

Compared to non-breathable and hot 'membrane based' systems, CQC's system still offers the wearer high protection, but with the addition of added comfort and low burden through the use of lightweight & breathable fabrics. This glove system allows maximum functionality for military and civil CBRN specialists around the world.

Our Protective Gloves are made from a rugged ripstop outer fabric and an activated carbon liner, offering high air permeability and reducing the heat burden. Gloves can be supplied with an extended gauntlet for wear with CBRN undergarments or an alternative design to be worn with a CBRN oversuit. Our gloves are designed with leather patches to increase durability and offer touch screen capabilities.

Full size range is available.

SPECIFICATIONS & KEY FEATURES

- Lightweight
 - High air permeability
 - Compatible with a wide range of CBRN protective clothing
 - 20 year shelf life
 - 24 hours protection
 - Fire Retardant
 - Water Oil/Repellent
