

TARGA 2 CBRN Protection System

With comfort and protection at its' core, the TARGA 2 oversuit offers the ultimate in functionality for First Responders, Military, and other CBRN trained specialists

The TARGA 2 CBRN Protection System has been designed & developed to provide 24-hour protection against a wide range of CWA threats in a contaminated CBRN environment. Developed for use in hot & humid environments, the TARGA system utilises a lightweight & breathable carbon inner combined with an inherent fire retardant & rugged Aramid based outer. This fabric combination allows the wearer to function at ease for extended periods, in even the most difficult of contaminated CBRN environments. With unique closure systems including integrated storm cuffs and waist skirt, the TARGA 2 design ensures that when worn with the appropriate ancillary items (approved CBRN boots, gloves & respirator), no vapour ingress is possible around these

KEY FEATURES:

- 24-hour protection to NATO standard*
- Exceeds MIST (Man in Simulant Test) requirements to NATO standard*
- Inherently Fire Retardant
- Rugged Aramid outer
- Oil & liquid repellent
- 10 year shelf life
