

FIBRELIGHT Helo Ladder

The Fibrelight Helo Ladder has been specially designed to withstand commercial and specialist access requirements.

More heavyweight than our Tactical or Emergency ladder, and developed with military aircraft as its core focus, the Helo Ladder has been manufactured using a robust GRP rung with black Line-x textured coating along with Fibrelights' patented fire-retardant locking webbing, meaning the Helo Ladder is suitable for many applications and perfect for when vertical access is required. The Helo ladder can be quickly deployed when required from its specially designed bag (optional) and attached using a carabiner or hoisted with a hook and pole to attach to a building or vessel.

Due to its strength and adaptability, the Fibrelight Helo Ladder would be perfectly suited to the military, coastguard and police.

The Fibrelight Helo Ladder is customisable with many options including light stick holders, ballast rungs, anti-abrasion patches and safety line attachment points.

Detailed drawings available upon request.
