

FIBRELIGHT Rod Stretcher

The Fibrelight Rod Stretcher is a super-lightweight stretcher solution that can be swiftly set up at the scene of the emergency. The Rod Stretcher is designed to be as simple as possible so that it requires little to no training.

The Rod Stretcher offers a rigid support for the casualty that can be carried between a six-man team. The stretcher is fully adjustable to accommodate a wide range of sizes and will securely contain a casualty for a vertical or horizontal lift. The simplistic and modern design allows a casualty to be recovered with minimal effort for the rescuers and maximum support for the casualty.

The stretchers compact nature enables it to be easily stowed in an emergency vehicle and carried by a single person to the scene of the emergency.

The Rod Stretcher has been designed for use by rescue teams, paramedics and first aiders both on land and with the aid of the flotation supports in water.

KEY FEATURES:

- Lightweight
- Rigid spinal support
- Fully adjustable for height
- Removable padded head and neck support
- Capable of vertical rescue
- Capable of water rescue
- 3 years manufacturers warranty

SPECIFICATIONS:

- Length - 1.65m
- Diameter - 170mm
- Weight - 6kgs
- Safe working load of 200kgs

FIBRELIGHT Rod Stretcher

The Rod Stretcher is manufactured using re-enforcing rods of Carbon Fibre that are enclosed within tubular flanged webbing. When fitted and sewn at right angles between the double thickness pockets of a second webbing an incredibly strong structure is created. The result is a device that is very strong yet still lightweight and compact.

The material is wipe and spray clean as well as rot and mildew resistant. The Stretcher has been snatch tested over 10,000 cycles with no deterioration. The webbing has tested against UV light, oil resistance and practical performance.

The Rod Stretcher can be supplied in multi colour or black.

The following additional extras are offered:

- Flotation supports which, as a pair will float up to 200kg of weight
- Padded bag, which converts into a padded back support
