

NATO LIGHTWEIGHT FABRIC STRETCHER CQC ref. LOG1468

This light, versatile, easy to store fabric stretcher/carry litter is designed for infantry soldiers who do not have sufficient space to carry a rigid or folding stretcher. It is constructed using high tenacity PU-coated nylon and high tensile strength nylon webbing.

Tested to a maximum weight in excess of 300kg it can be stored in a pouch, packing down to 25cm x 17.5cm x 7.5cm and weighing only 0.75kg. Manufactured in olive green, the stretcher has dimensions of 210cm x 75cm, with three handles either side. The handles at either end also have a long loop to enable over-the-shoulder carriage. The stretcher has a casualty securing strap over the chest area and a foot pocket.

FEATURES

- In-service with a NATO army
- Weight: 0.75kg
- Dimensions: 210cm x 75cm
- Pu-coated nylon
- Water-resistant
- Load bearing capacity: 300kg
- Carry bag included
