TACTICAL LADDER STANDOFF

CQC ref. NPN319

The CQC tactical ladder standoff is a high-quality UK manufactured part for use with the Fibrelight Tactical ladders. Manufactured in hard wearing yet lightweight ABS injection moulded plastic, this standoff allows easier access when the ladder is used against a flat surface, allowing the operator to grip with a gloved hand and also allowing easier toe hold for boots.

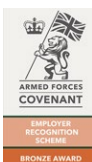

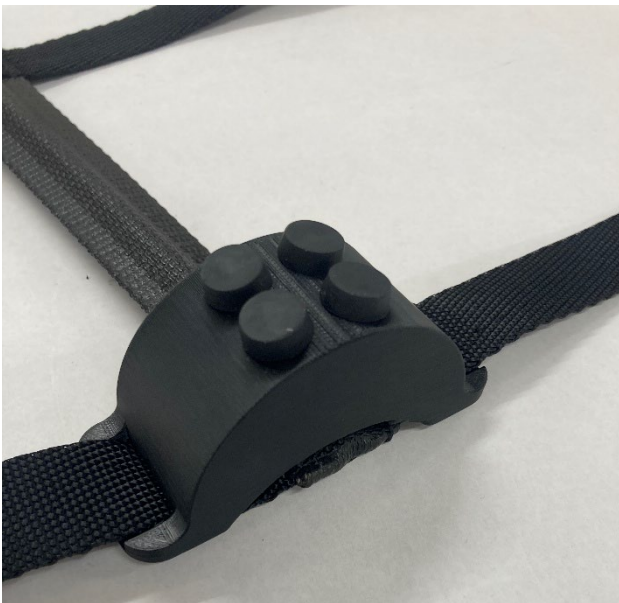

Extremely light at only 60g per pair and utilising rubber feet which give noise suppression and also extra grip.

The standoffs are extremely easy to fit, require no maintenance and are available to retrofit to Fibrelight Tactical ladders and nets.

FEATURES

- Weight 60g per pair
- Patent number – EP2178743
- Fitment – By end user
- Commodity code – 3926909790
